

# The School of Conscious State

Date 21-02-2020

Dear Parent

It is with utmost delight I am writing to inform you that your kid is selected for the faculty of Science and Arts in The School of Conscious State. But I want to speak to each of you as it is very important that a parent is sensible enough to understand/practice the phenomenon how one evolves into a powerful thinker and a successful person, in order to deliver such an environment/resources to their younger generations.

The idea of The Conscious State is quite simple. We intend to remove the insecurities of a parent and child towards the survival in the competition by providing resources/opportunities and mentors upfront and allow the student to invest their energies in exploring their fullest potentials to achieve technical and intellectual excellence in a relaxed environment.

We are well aware of the fact that every student wants to secure their careers and dreams, towards which a great enquiry and exploration one goes through, often leading to a monetary benefit and no significant thought liberation at emotional state. We at CST are well aware as to the actual phenomenon that goes in achieving high places, so we have designed learning in the schooling, in a way that capacitates the student with what's required so that their learning caters good grades, logical thinking, and problem solving abilities, with liberation of the thought to achieve a higher conscious state.

*"I believe that a student should not be ready to face the world, instead the world needs to be ready to face the powerful mind that's conceived by Nature"*

It's a shame that world has succumbed/surrendered to an ugly lie projected as a decorated truth, and not letting the beautiful phenomenon of nature unfold.

There are 1000 secrets as to how a matured and a powerful thinker conceive a great work. Unfortunately, none of them are documented neither taught in any schools, for great works are not an outcome of a rule book. It takes a lifetime for self discovery to know as to how it is done. As hard it is to know how it is done, double the effort it takes to get a right master.

The above hurdles that a student goes through should be taken out and it is very important that we act on that necessity in order to deliver a great mind and a joyful person to the world. It is a collective responsibility that we both share to give a sacred environment where the saintly ritual takes place.

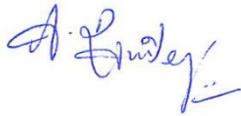

It is very important that parent conquers his/her fears and become conscious of the decorated lie, so they realize and do what's more practical and real. If it is the date you seek to substantiate these facts we have tons of it coming from scientists/doctors/administrators/entrepreneurs. But I implore you to not infuse fear or any element of doubt to a budding fearless mind.

The mindset and attitude of the people is critical in CST. What we intend to do here is not possible for person with a weak morale. You are the first heroes they encounter so give them the attitude of a fearless mind.

I believe you support your child and give them an opportunity to take this chance and send a fearless mind to the CST where they could go on a spectacular journey with the blessings of Great Mentors.

I give you this sacred environment and learning platform to you all.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ravi Tej. Allam". The signature is stylized and includes a flourish at the end.

Ravi Tej.Allam

Director of Admissions
